SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science (CGPA 8.53/10.0) with hands-on experience building web applications and AI/ML-driven systems. Proficient in Python, JavaScript, React.js, and Django, with practical exposure to computer vision (YOLO, OpenCV), machine learning (Scikit-Learn, Pandas), and LangChain-based conversational AI. Seeking a Python Developer / AI-ML Developer role to design and deliver scalable, data-driven applications.

EXPERIENCE

Full Stack Development Intern — *NoviTech*

- Built and deployed responsive web applications using HTML5, CSS3, JavaScript, and React.js, translating UI requirements into functional, cross-browser components.
- Implemented end-to-end CRUD functionality by integrating frontend interfaces with backend APIs, ensuring reliable data flow between client and server.
- Collaborated within a team development workflow using Git and GitHub for version control, branching, and code reviews.

PROJECTS

AquaVision - Underwater Object Detection & Tracking

- Engineered an AI-driven underwater object detection and tracking system using YOLO and OpenCV to identify objects in real time from video input.
- Built a backend to serve detection results and integrated a LangChain-powered chatbot, enabling users to query real-time detection data conversationally.

House Rent Prediction System

- Developed an end-to-end Machine Learning regression model using Python, Pandas, and Scikit-Learn to predict rental prices based on location, size, and amenities with exploratory data analysis.

Laptop Price & Specs Comparison Web App

- Developed a responsive React.js application enabling users to compare laptops side-by-side by specifications, pricing, and ratings.
- Designed dynamic JSON-based data rendering to display product listings efficiently without page reloads.

SKILLS

Languages: Python, JavaScript, SQL
Frontend: HTML5, CSS3, React.js
Backend: Django
Database: MySQL
AI / Machine Learning: YOLO, OpenCV, Scikit-Learn, Pandas, LangChain
Tools & Platforms: Git, GitHub
